

MIL-C-5040 Parachute Cord Specifications & Technical Data

Manufactured from heat treated nylon to military specification MIL-C-5040.

Type	Diameter	MBS	Colour	# Core Strands	NSN	Package	PART #
1A	1mm (1/32")	100lbf	Natural (White)	0	4020-21-882-9701	700 yards	18-100-70
2	2.5mm (3/32")	400lbf	Natural (White)	4	4020-21-882-9715	700 yards	18-400-70
3	3mm (1/8")	550lbf	Natural (White)	7	4020-21-882-9680	400 yards	18-550-70
3	3mm (1/8")	550lbf	Olive Drab (Camo)	7	4020-21-874-2586	400 yards	19-550-40-900
3	3mm (1/8")	550lbf	Black	7		400 yards	19-550-40-200
3	3mm (1/8")	550lbf	Red	7	4020-21-106-1391	400 yards	19-550-40-500

*Rated breaking strength is the optimum strength, achieved under laboratory conditions, in accordance with prescribed test procedures, on a new rope, pulling at a slow, steady rate in a straight line.

Applications

- Military gear & equipment
- General use
- Lashing

Features

- Soft feel for excellent handling
- Non-rotating torque free
- Excellent knotting

Fiber Specifications

- Excellent microbial resistance
- Durability
- Melts at 258°C

Specifications may change without notice. We recommend referring to cancord.com for the most up to date information, or requesting a current specification sheet when ordering.
